

Limitless™ Din-Rail Receiver

WDRR Series

DESCRIPTION

The WDRR Series is a reliable din-rail or panel-mountable receiver that is designed to receive a wireless signal from a Limitless™ digital input. The WDRR then communicates the Limitless™ digital input status (i.e. switch open or closed) to a PLC (programmable logic controller) or any controller capable of NPN/PNP-type inputs. Honeywell's wireless solutions can save up to 60% compared to traditional wired solutions by

FEATURES

Wireless/Electrical design

- Selectable NPN or PNP-type output
- Configurable normally open or normally closed output for up to 14 Limitless™ inputs
- Reliable, flexible, and secure wireless transmission
- Radio (license-free and global): WPAN 802.15.4, 2.4 GHz, point-to-point
- Up to 1000 ft [305 m] communication range
- FCC 15, IC, ACMA & ETSI, COFETEL, and WPC
- Field pairing allows for rapid adding or subtracting inputs for quick configuration
- 10 Vdc to 28 Vdc supply
- Diagnostic functions including RF and low battery

Mechanical design

- Din-Rail or screw mount via tabs
- Cage clamp screw terminal blocks for input/output connections
- Sealed to IP20
- Multiple LED function/status indicators
- LED RF signal strength indication for up to 14 Limitless™ inputs
- Direct or remote mount antenna options

eliminating the need for conduit, connectors, and wire while significantly reducing installation and labor costs.

Accommodating up to 14 Limitless™ digital inputs, the WDRR Series is for applications requiring multiple wireless inputs. These inputs communicate to a PLC or controller via NPN or PNP-type output, along with RF communication and battery diagnostics. Blue LEDs give visual confirmation that the system is wirelessly connected.

BENEFITS

- Enables presence/absence detection in remote parts of application/machinery, where wiring is costly or not feasible
- Ability to reconfigure and network multiple inputs, or point-to-point with personalized addresses which allows for adding, subtracting or relocating Limitless™ inputs easily
- Reduced installation/maintenance costs with no wiring to Limitless™ inputs, conduit, strain relief, clips, connectors, connection boxes, etc.
- Eliminates issues with wire connection integrity on moving equipment
- LEDs indicate change of status, low battery, RF signal loss, pairing function, & diagnostic functions
- Communication security per the IEEE 802.15.4 standard (16-bit PAN ID, 16-bit address and 128-bit security key)

POTENTIAL APPLICATIONS

- Valve position
- Crane boom/jib/skew position
- Lifts
- Material handling
- Presses
- Construction/Ag machines
- Conveyors
- Remote or temporary equipment
- Movable machinery
- Grain diverters or flaps
- Door position
- Hose attachment verification
- Specialty machines

CAUTION

The WDRR receiver offers optimal performance when paired with Limitless™ inputs that have a firmware version of 7170 or a greater number (i.e., FW7170 will be printed on the Limitless™ input label). If the Limitless™ input is paired with older firmware (FW7170 or a lesser number), the WDRR may exhibit delayed responses under simultaneous operation.
